Your almost unfair advantage

Award winning market-scanning tools that highlight trade opportunities based on support and resistance levels.

- Chart patterns; Fibonacci patterns and Key Levels are **automatically identified by pattern recognition engines** that continuously monitor financial instruments.
- Emerging patterns provides one with **early warning of where trade opportunities are developing** that is, where price is approaching support or resistance. This is useful to swing traders looking for ranges within which they can trade.
- The Volatility Analysis tool provides **statistical information about price volatility** for the instruments traded. Volatility Analysis provides an **assessment of risk** when setting take profit and stop-loss levels.
- Covers **most financial markets** such as Forex, Indices, Commodities, Stocks, CFD's and Futures.
- Autochartist saves time by **continuously scanning the markets for trade opportunities**.
- Each Chart pattern; Fibonacci pattern and Key Level comes with a **set of visual quality indicators** that give novice traders an ability to interpret patterns, while it lets more experienced traders perform advanced search functions.
- Autochartist provides a **wide variety of educational material** such as this online manual, a quick start guide, videos, eBooks and free webinars
